Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/619,876

Applicant(s)

YONEZAWA ET AL. 24

Examiner

Truc T Chuong

Art Unit

2174

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-18 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on ____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) ____.
- 4) ☒ Interview Summary (PTO-413) Paper No(s). ____ KX
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

DETAILED ACTION

1. This communication is responsive to Amendment A, filed 03/17/03.
2. Claims 1-18 are pending in this application. Claims 1, 17, and 18 are independent claims. In Amendment A, claims 1-5, 7-8, and 15-18 are amended. This action is made final.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Jain et al. (U.S. Patent No. 5,729,471).

As to claim 1, Jain teaches a communication apparatus (master computer, col. 30 lines 50-65) which receives image data taken by an imaging apparatus (camera, col. 8 line 27) connected through a network (col. 30 lines 60), comprising:

storage unit for storing control information to control said imaging apparatus (a programmed computer process, col. 17 lines 5-16); and

an output unit for outputting to a display unit a synthetic image (figs. 18-21) which is obtained by synthesizing a symbol (camera list, fig. 4, and cameras 1-4 of figs. 18-19e) representing a state of said imaging apparatus on map image indicating a setting location (col. 17 lines 5-9, CAMERA ON of fig. 4, and figs. 20a-d, 21) of said imaging

Art Unit: 2174

apparatus in accordance with the control information stored in said storage unit (storage server, col. 11 lines 42-50, fig. 15).

As to claim 2, Jain teaches the plural control information (col. 7 lines 20-24, and fig. 4), plural symbols (col. 8 lines 26-30, figs. 4, 8, 19a-e, and 21) representing the respective states of said imaging apparatus (CAMERA ON of fig. 4) corresponding to the plural control information are synthesized on map image (fig. 4).

As to claim 3, Jain teaches the symbol corresponding to said imaging apparatus is displayed on map image information (col. 21 lines 4-9 and fig. 4), and a control signal for controlling said imaging apparatus is output by causing an instruction device to instruct the symbol corresponding to said imaging apparatus (figs. 18, 19a-e, and 21).

As to claim 4, Jain teaches the control information stored in said storage unit is transmitted to said imaging apparatus by causing an instruction device to instruct information corresponding to the symbol (col. 8 lines 55-59, figs. 4 and 8).

As to claim 5, Jain shows the image data changed by controlling said imaging apparatus is displayed on said display unit, and said storage unit stores as the control information the state of said imaging apparatus when an instruction was given by an instruction device (selecting cameras, col. 19 lines 43-56).

As to claim 6, Jain shows the control information includes at least one of panning, tilting, or zooming (col. 12 lines 52-64 and fig. 7) control information for said imaging apparatus.

As to claim 7, Jain teaches storage unit stores a title corresponding to the control information (command, col. 7 lines 20-24 and fig. 6).

Art Unit: 2174

As to claim 8, Jain inherently shows output unit also output the title on display unit because a viewer may request a preferred camera position or ask questions to interact with the system (col. 14 lines 55-61) from the display unit (figs. 4 and 6).

As to claim 9, Jain teaches the title with instruction image is moved onto the symbol (CAMERA ON of camera list, figs. 4, and figs. 18 and 21).

As to claim 10, Jain inherently shows the control information can be deleted according to a deletion instruction from an instruction device because cameras 1, 2, and 3 of fig. 4 can be turned OFF or any other options by a user/viewer.

As to claim 11, Jain teaches plural imaging apparatuses (multiple cameras, col. 8 lines 23-30 and figs. 2, 4, 5, 8, and 18).

As to claim 12, Jain teaches the state of imaging apparatus is the direction of said imaging apparatus (direction, col. 33 lines 3-5).

As to claim 13, Jain inherently shows the state of imaging apparatus is direction of the imaging apparatus because there are more than one cameras (figs. 2, 4, 5, 8, and 18) which would have different states with different directions.

As to claim 14, this is a combination of claims 11 and 12 above.

As to claim 15, Jain teaches a synthesizing position can be arbitrarily designated when the symbol is synthesized to the map image (figs. 4, 19a-e, and 21).

As to claim 16, Jain inherently teaches the storage unit (Video Databases, col. 40 lines 4-67) stores a synthesizing position corresponding to the control information.

As to claim 17, this is a method claim of system claim 1. Note the rejection of claim 1 above.

As to claim 18, this is a computer product claim of system claim 1 or method claim 17.

Note the rejection of claim 1 above.

Response to Arguments

5. Applicant's arguments filed in Amendment A have been fully considered but they are not persuasive.

Applicants argued the following:

- a. Jain does not disclose that an map image indicating a setting location of an imaging apparatus is displayed on the graphical display of fig. 4.
- b. Jain does not disclose that symbol representing a state of the image apparatus is synthesized on the map image.

Examiner disagrees for the following reasons:

As per (a), Jain teaches that an map image indicating a setting location of an imaging apparatus is displayed on the graphical display of fig. 4 because the cameras of fig. 4 are incorporated with figs. 18 and 19a-e, according to Jain's invention, in order to view the location of each camera is located.

As per (b), Jain discloses that symbol representing a state of the image apparatus is synthesized on the map image (CAMERA ON of fig. 4, and figs. 18 and 19a-e).

Art Unit: 2174

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Truc T Chuong whose telephone number is 703-305-5753. The examiner can normally be reached on M-F 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kristine L. Kincaid can be reached on 703-308-0640. The fax phone numbers for the organization where this application or proceeding is assigned are 703-746-7239 for regular communications and 703-746-7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-3900.
